Fund overview

The investment objective of the fund is to generate capital growth over the long term.

The Fund is actively managed and will aim to meet its investment objective by investing at least 90% of its net asset value in a portfolio of equity instruments of companies that are domiciled, incorporated or have a significant part of their business in the UK and that are listed on recognised UK stock exchanges.

The companies will fit the criteria of having either greater than 45% of their sales originating in the UK or greater than 2/3 of their assets based in the UK. The measurement of these criteria is based on the respective company's latest published annual report.

In following these criteria, the Fund is investing in companies that are not only listed on UK based stock exchanges but are also closely linked to the UK economy.

There is no guarantee that the investment objective will be achieved. Please see important information at the end of this document.
